

Production Technician

Entry-level position located in Saginaw, MI with Turn One High Performance Steering

Job Summary

The production technician position is a growth-based role for an able worker who desires to learn and develop technical proficiencies in a manufacturing, assembly, and rebuilding environment. Starting out, this position will primarily be responsible for receiving shipments, preparing and tearing down power steering component assemblies for new production and service, inventory control, and shipping. As a small business, everyone wears multiple hats, so job responsibilities may vary from day to day. As the production technician gains familiarity with our products, assemblies, and procedures, they will learn how to build new products and rebuild customer assemblies. An excellent technician must have great attention to detail, a strong work ethic, and a commitment to quality, as many of the components they work with will be used in performance-oriented vehicles and race cars.

Job Requirements

- Must have, or be currently working toward, a high school diploma or equivalent
- Able to lift up to 50 lbs safely
- Prior hands-on, mechanical experience is preferred (hand tools and power tools)
- Able to pass a drug test
- Attention to detail
- Problem-solver
- Quick, willing, and eager learner
- Able to see a task through

Job Responsibilities

- Disassembly and cleaning of power steering components
- Shipping and receiving duties
- Stocking inventory
- Assisting in production processes as needed

Benefits

- Weekly direct deposit
- 2-week, 4-week, 60-day, and 90-day evaluations
 - Continued employment will be based on these evaluations
- After 90-day evaluation – 3% match IRA Retirement Account
- One week paid vacation after one year of employment
- Growth potential: Production, Machining/Manufacturing, Sales, Marketing, etc.

Job Classification

Full-time; part-time would be considered to start.

Compensation

\$15-18, depending on experience

Production Manager

About Turn One

Turn One is a family-owned aftermarket automotive manufacturing business that produces, modifies, and rebuilds high-performance hydraulic steering components such as pumps, rack & pinion gears, fittings, pulleys, and accessories. Our new products are mostly used in performance racing vehicles, from weekend drift cars to specialized race cars in professional motorsports. We are committed to the highest quality and performance standards in everything we do and strive to set the industry standard for quality and customer service. We offer a small, tight-knit work environment and have aggressive growth plans for new products in new markets. We want to continue to produce outstanding products in Saginaw, Michigan, and are looking to add to our small but talented team to accomplish this.
